

Join Bernd Lieberth for an in-depth analysis of PROFINET functionality and Industrial Ethernet technologies

PROFINET & PROFIBUS Technical Seminar

Topic: Understanding PROFINET...the Leading Industrial Ethernet standard

Bernd Lieberth, Siemens Industrial Automation expert, is the official face of PROFIBUS & PROFINET technology in Southeast Asia.

As Chairman of the Profibus/Profinet Association of Southeast Asia, Lieberth has lived and worked through the recent industrialisation of China and her regional neighbours, witnessing first hand Asia's embrace of modern manufacturing technologies and economic reform.

Bernd Lieberth's 2 hour Technical Seminar will review PROFINET growth over the last five years, followed by a series of technical demonstrations on PROFINET functionality including safety, energy management and System diagnostics.

Seminar Contents:

- Market News and Development of PROFIBUS and PROFINET Technology.
- PROFINET features and benefits, this includes Diagnostic, Wireless solutions, Safety and Investment protection.
- PROFInergy and Innovations: I-Device, Shared Device and Redundancy.
